RESOLUTION No 006

We, the International Treasury Monetary One (also referred to as M1), recognize as our main responsibility to maintain Peace and security throughout the World by conducting international monetary reforms, in accordance with the goals and principles of M1.

The International Treasury Monetary One is guided by previous M1 resolutions and statements.

The *International Treasury Monetary One* is the owner and manager of the World Account at the **WORLD BANK**, Account No. **01-00-01-4-AAA-777-C3-AM-01**, distributed to various banks in 172 (One hundred and seventy-two) countries around the world.

The *International Treasury M1* is the owner and manager of the World Account in the **WORLD BANK** Account No. **01-1-700-3516 222 777 8888 999**, distributed to various banks in 172 (One hundred and seventy-two) countries around the world.

Confirming the Resolution No. 1 (001/RES2020) from April 07, 2020 «Anti crisis financial measures», Resolution No. 2 (002/RES2020) from June 02, 2020 «The one way out of the global financial crisis», Resolution No. 4 (004/RES2021) from February 23, 2021 «The cancellation of all issues based on historical assets written up in the Resolution M1 No. 4

(004/RES2021) from February 23, 2021, in order to form a new well-balanced financial system»),

Confirming that the monetary reform is based on the principles contained in the Resolution 001/RES2020 (2020) on Anti crisis financial measures, on the approval of new World reserve currencies in the Global Financial System and the introduction of new World reserve currencies into Global financial turnover, legally approved in a specific measure of filling XAU (Bank Gold): a) «**Golden Soviet Ruble**»; b) «**Golden US Dollar**»; c) «**Golden ECU**», the International Treasury Monetary One has started issuing M1 Treasury Bills denominated in three new reserve World Currencies (hereinafter referred to as «**TB M1**»). The **TB M1** are intended for placement in the Treasuries of the Countries of the World, their National, Reserve, Central, State Banks in order to increase and ensure the Country's gold balance of the Countries of the World and ensure the issuance of national currencies of the Countries of the World, which will lead to a clear initial value of the Country's currencies of the Countries of the World for exchange trading and the restoration of paralyzed international trade and other agreements.

Recalling the recommendations to the Governments and their related financial authorities to adopt one of these world reserve currencies and to approve the necessary steps both at the level of parliaments and at the level of their central banks,

Recalling that, taking into account the positive features of Special Drawing Rights (SDR), the **TB M1** will be used as a promising important international element for the formation of official currency reserve systems, the regulation of balance of payments and the measurement of the value of new national currencies,

Reaffirming the need for all countries to put into effect a single world payment standard for the World Currency – XAU (Bank gold), in connection with the collapse of the old reserve currency – the US Dollar, it is recommended to immediately introduce a GOLD STANDARD in the Global Financial System,

Welcoming the measures taken in the implementation of the Resolution 004/RES2021 (2021), calling for their continuation, and taking note of the deployment in this regard of operations around the world to block the use of historical assets, arrest and bring to justice those involved in their illegal use,

Welcoming the countries seeking to establish cooperation within the framework of the Resolution 002/RES2020 (2020), in particular paragraphs 12, 13, 14, 15,

Confirming the readiness to cooperate in accordance with the Resolution 002/RES2020 (2020), paragraph 12: Concerning debts to the International Monetary Fund. We recommend that the Ministries of Finance conduct an audit of the debts after the introduction of the Jamaican currency system; Submit reports to the International Treasury Monetary One, on the basis of which the International Treasury Monetary One will provide the necessary assets for the complete closure of government debts to the International Monetary Fund,

Confirming the readiness to cooperate in accordance with the Resolution 002/RES2020 (2020), paragraph 13: Concerning international, external public debts that have formed between the countries after the introduction of the Jamaican monetary system. We recommend that countries conduct an audit and classify these debts, identify medium-and long-term debts, and submit a report to the International Treasury Monetary One on medium-and long-term debts, exclusively interstate debts. Based on the reports, the International Treasury Monetary One will provide the necessary assets for the complete closure of public debts between countries. The exceptions are state debts formed for the implementation of investment projects and state programs in accordance with the priority directions of the country's economic development,

Confirming our readiness to cooperate in accordance with the recommendations of the Resolution 002/RES2020 (2020), paragraph 14: We recommend that all countries review state programs and investment projects in accordance with the priority directions of the country's economic development; Identify programs and projects that meet the conditions for the development of environmental safety, solving the problem of food production, solving the problem of employment, solving the problems of infrastructure development, solving the housing issue, by providing all citizens with housing, the transition to the rational use of natural resources. We recommend that all countries review the concepts of energy security with the transition to alternative environmentally friendly energy sources, taking into account the availability of innovative free energy technologies that will be actively implemented,

Confirming our readiness to cooperate in accordance with the recommendations of the Resolution 002/RES2020 (2020), paragraph 15: We recommend that the prepared state programs and investment projects be submitted to the International Treasury Monetary One in accordance with the priority directions of the country's economic development. The International Treasury Monetary One will provide the necessary assets to finance government programs and investment projects. A special working group with the participating country will determine the conditions and the program in the form of financing schedule. The task of the

Special Working Group will be to determine which state programs will receive irrevocable funding,

Reaffirming the need to put an end to the continuing increase in the illegal use of fiat (fiduciary) money on the basis of accounts held and managed by the International Treasury Monetary One,

Reminding that the Fiat (fiduciary) money has no intrinsic value and no collateral with reserves. These assets are only backed up with people's trust in the state and the level of the state's influence in the world. Depending on the method of issue, three types of money can be distinguished: commodity, credit and fiat. Commodity money played an important role in metal monetary systems, the credit one in the countries where there was no state monopoly on the issue of money. Fiat money has historically been issued by the state. Today, states not only issue cash, but also provide confidence in non-cash money created by banks. Therefore, all modern money can be considered fiat. *Taking into account* that fiat money is a symbolic credit unsecured paper money, which is called fiduciary, from Lat. feducia, «trust», purchasing power is based solely on trust in the issuer. The nominal value of such money does not depend on its material or on the collateral stored in the bank. In real (metal) monetary systems, the size of the issue is limited by bank reserves (liquid assets of banks), in fiat systems such restrictions disappear,

The *International Treasury Monetary One*, as the main Owner and manager of the entire world gold reserve, both bank balance sheet gold and off-balance sheet gold on the Planet Earth, introduces the following **Solutions**:

We call on all countries of the world, as well as the States that signed the adoption of the Millennium Declaration, to unite efforts in the fight against the source of all ills on Earth – Poverty; *The International Treasury Monetary One* confirms its readiness to provide all countries with the necessary amount of assets to ensure the issuance of valid money (001/RES2020 (2020), 005/RES2021 (2021)).

We condemn all banks that illegally use historical assets, the right of management and disposal of which has passed to the International Treasury Monetary One and try to restrict the access of the International Treasury Monetary One to the assets retained in every criminal way.

We welcome the States that have joined, and the States that are ready to join cooperation and interaction with the International Treasury Monetary One, in suppressing the criminal retention of asset management rights by banks by the legal owner and manager, the International Treasury Monetary One, in order to bring bank employees to criminal

responsibility. Thanks to such cooperation and the triumph of justice and equality of everyone before the laws, the International Treasury Monetary One reminds of the personal responsibility of bank employees for carrying out criminal actions and calls once again on bank employees to be aware of their actions in order to refrain from committing crimes.

We Condemn all existing issues of new Fiat currency on the basis of illegal use of historical assets, which right to control and dispose moved to the International Treasury Monetary One accounted for in the Resolution 004/RES2021 (2021), which are increasingly undermine the process of stabilization of the transition to a new financial system and threaten the lives of hundreds of millions of people on the Earth. In this regard, as a Global Regulator we *prohibit* the formation of the issue of new fiat money based on the illegal use of historical assets taken into account in the Resolution 004/RES2021 (2021).

We condemn all ongoing issues of new fiat money in any country of the world and *strongly recommend* that all States immediately begin the transition of existing issues to new valid money secured by XAU on the basis of Treasury Bills of the International Treasury Monetary One.

Having the responsibility and exclusive role of the International Treasury Monetary One, as well as responsibility to all States of the World, the International Treasury Monetary One confirms its readiness to provide all countries with the necessary number of Treasury Bills of the International Treasury Monetary One to ensure the issuance of valid money (001/RES2020 (2020)).

We remind you that based on the recommendations of Basel III and Resolution 001/RES2020 (2020), the Treasury Bills of the International Treasury Monetary One are issued in two categories: (1) Reserve World Currency (001/RES2020 (2020)); (2) Exchange-traded World Currency denominated in any currency of the World.

We confirm once again, on the basis of ownership and management of World Accounts in **World Bank**, Account No. **01-00-01-4-AAA-777-C3-AM-01** and Account No. **01-1-700-3516 222 777 8888 999**, which are the main worldwide security metal accounts distributed to various banks in 172 (One hundred and seventy-two) countries around the world, on the basis of the Resolution 001/RES2020 (2020), that the Treasury Bills of the International Treasury Monetary One are the main, Internationally accepted, verified security instrument for issuing new valid money.

We condemn all new crypto currencies that have been formed and are being formed that do not have a valid collateral, the mining of which increasingly undermines the process of

stabilizing the transition to a new financial system in the World, strengthening the processes of money laundering, financing of criminal activities, extremism and terrorism.

Despite the Fifth EU Directive on combating money laundering (AMLD5) entered into force in January 2020, in spite of all the requirements of FATF members, formulated in June last year on the recommendations on the crypto currencies regulation, all new input control measures introduced have proven to be ineffective and demonstrate the vulnerability of the Fiat financial system. In this connection, the crypto currency will remain the main tool of the underworld in the laundering of money obtained by criminal means and financing of criminal activities, the financing of extremism and terrorism,

We are introducing a ban on all types of crypto currencies and *We call on* all States to realize the harm of using crypto currency today and in the future. With the use of crypto currency, the lives of hundreds of millions of people on Earth are put at risk. *We call on* all States to introduce bans on the use of crypto currencies and develop measures to counter the use of them, which will create a basis for combating money laundering, the financing of criminal activities, the financing of extremism and terrorism.

We welcome the bans introduced by States on the use of crypto currencies, which will undoubtedly strengthen the basis of the current issues for new valid money backed up with XAU on the basis of the Treasury Bills of the International Treasury Monetary One.

Being forced to observe the formation of military conflicts, zones of stress, based on the selfish desire of several States to seize natural resources, hydrocarbons, rare earth elements, other countries, with the aim of ensuring and maintaining its leadership in the near future, *we call on* to comprehend the existence of higher values, based on People, Human Life, Human Rights, Freedom of Will and Choice and *we remind* that there is no apologise for genocide, extremism and terrorism, and any crimes against humanity are punished on the Earth!

Recalling that peace and security, development and human rights are the pillars on which sustainable creative development is formed, and the foundations of collective security and well-being, and *recognizing* that development, peace, security and human rights are interconnected and strengthen each other,

Recognizing that peace is not just the absence of conflicts, but a positive, dynamic and participatory process in which dialogue is encouraged, conflicts are resolved in a spirit of mutual understanding and cooperation and socio-economic development is ensured,

The International Treasury Monetary One *resolves* to continue to deal with these issues to its specialized units – the Special Department for Overcoming the Global Financial Crisis «Anti-Crisis Center» and the Department of Special Projects and Programs.

The control and audit of the implementation of this Resolution No. 006 is entrusted to the Executive Committee of the International Treasury Monetary One.

Approved, completed and executed
